### About EDF

Electricité de France (EDF) is a French public electricity production and supply company, 99.98% owned by the French state. The company is the leading producer and supplier of electricity in France and Europe and one of the mondial leaders.

### What will the BATMAX project add to the current scientific state-of-the-art?

BATMAX project will help battery users and battery projects adopt a more precise approach on battery status through the accurate estimate of indicators related to real-life use cases.

### How will the BATMAX project make Europe more sustainable?

Through its contribution making energy storage systems more reliable, more efficient, and more competitive, BATMAX project will help the deployment of future energy storage systems and have a role in the European electrical network energy transition.

### What will be the role of your organization in the project?

EDF R&D will contribute as end user. We will be directly involved in WP1, WP7 and WP8.

### What will be the main impact of the project?

EDF has been actively participating for years in Europe's challenges in terms of energy transition. In this regard, the improvement and optimal use of battery systems has emerged as one of the keys to promoting the development of renewable energies.

### Why is the BATMAX project important?

The BATMAX project has the potential to contribute to better use of battery storage to improve our ability to adopt clean, safe, sustainable, and efficient energy and transportation solutions.

GRANT AGREEMENT: 101104013

Funded by the European Union. Views and opinions however those of the author(s) only and do not necessarily reflect those of the European Union or the European Climate, Infrastructure and Environment Executive Agency (CINEA).
